**Folixor has been a real life saver for this women..**

**I'm 49 years old and for the past couple of years my "monthly" had become debilitating. The flow had gotten way out of control. My older sister had told me to start taking at least 1mg daily of Folic Acid. All I could find was 80mcg's in the health food/drug stores. I bought the lower dosage and had no positive results. Then my sister (Imelda Benny) sent me your web sight and I ordered the higher dosage and within 50 days I'm a new women. So much so, that I've just purchased a bottle for my younger sister (who is now suffering the same symptoms I was), and a bottle for my girlfriend who suffers from hot flashes night and day. I now have energy and "get up and go" back, that had got and went.**

**Thank you so much!  
Margaret Quinn**
